

Interactive Whiteboard Solution

- Interactive Whiteboard
- Optical Touch Technology
- Sleek and Slim
- Infinite Content Options

The Samsung 650TS 65" LCD touchscreen display is an efficient, effective teaching tool. Its touch-sensitive optical technology, interactivity and whiteboard LCD software allow you to illustrate concepts by accessing PowerPoint presentations, videos, live webcam presentations via network, and more. The included whiteboard pen lets you add handwritten notes, even out to the edges of the screen. Its sleek, slim design allows for easy placement. And 1,920 x 1,080 p full HD resolution, 510 nits brightness, 5,000:1 static contrast ratio, non-glare glass and 178 ° viewing angle, provides a sharp, clear, brilliant from anywhere in the room.

Interactive 65" LCD Whiteboard

With a large screen size of 65" and high brightness levels of 510 nits, the 650TS LCD E-board delivers high-quality images even in brightly lit rooms.

Optical Touch Technology

The advanced technology of the 650TS enables touch-sensitivity all the way to the edges of the screen. The 650TS has accurate optical sensor technology, improved touch reliability and responsive touch, even in the edges and corners.

Superior Picture Technologies

Samsung picture technologies ensure the LCD screen is consistently bright and clear, regardless of what's on it. The 650TS features 1920 x 1080p full HD resolution, a high 510-nits brightness level, high 5,000:1 contrast ratio and non-glare glass. And glare and eye fatigue are minimized by an anti-reflective coating over tempered glass.

Sleek, Slim & 178 ° Viewing Angle

Slim design allows for easy placement. This LCD whiteboard is thin so it occupies less space than conventional blackboards for a more pleasant and comfortable environment. Also with wide viewing angles of 178 ° and a 1,920 x 1,080 high-resolution LCD screen, the 650TS ensures a great view from any seat in the classroom and enhances every student's learning experience.

Reliable Durability

The lifespan of the 650TS LCD panel is approximately 50,000 hours (or about 30 years when used 6 hours a day).

Interactive, Infinite Options

Concepts and ideas come to life when you are able to enhance your presentation with examples. The 650TS allows you to access content over computer or network then add handwritten comments with the included whiteboard pen. You can access content that includes Power Point presentations, photos, videos, live webcam interviews, impromptu online searches and more.
